

Seminar/CPD Presentations

23rd February 2017

1st Session: 10am to 12:30pm

2nd Session: 2pm to 4pm

Exeter City Council, Civic Centre, Exeter, EX1 1RQ

Limited spaces - RSVP which session to molly@pycgroup.co.uk

Agenda

- **Introduction to PYC Insulation**

- **Warmcel cellulose fibre blown Insulation** – Jasper Meade from PYC

  Warmcel – developments, technical detailing and installation methods both for on-site and off-site production facilities. Demonstrations with scale models showing the performance advantages of cellulose fibre insulation in construction for super insulated and Passive Houses with project examples of commercial and domestic sites.

- **Timber Frame – Principles and Opportunities** – Mike Chester, Cygnum Timber Frame

  Development in timber frame construction methods over the years from building regulation standard to Passivhaus. Utilising off-site manufactured wall, floor and roof systems, showing examples of large commercial Passivhaus projects like The Enterprise Centre at the UEA Norwich and Wolverhampton Schools and on-going large scale housing sites.

Q & A and opportunities to meet and discuss your individual projects

Bring plans etc for us to go over any details and specifications
